UMER ALI

CYBERSECURITY & CLOUD SECURITY ENTHUSIAST | ASPIRING SOC ANALYST

Lahore, Pakistan | 0304-4157489 | ua4157489@gmail.com | linkedin.com/in/umar-ali-ba935031b | github.com/ua4157489-code

PROFILE

Aspiring cybersecurity professional pursuing a Diploma in Cloud & Cyber Security, with hands-on experience in Linux administration, network security tools, infrastructure automation, and cloud fundamentals. Practiced in vulnerability assessment and penetration testing through TryHackMe and Hack The Box labs, complemented by Python projects that apply security and networking concepts to real-world scenarios. Motivated to contribute to a SOC or cloud security team while continuing to build technical depth.

EDUCATION

Diploma in Cloud & Cyber Security — Al-Nafi *In Progress*

Intermediate (FSc Pre-Engineering) *Completed*

CERTIFICATIONS

ICT Fundamentals and Data Management — Lahore University of Management Sciences (LUMS) *Completed*

TECHNICAL SKILLS

Security Tools Nmap, Wireshark, Burp Suite, Metasploit	**Security Concepts** SOC operations, incident response, ISO 27001, NIST, MITRE ATT&CK
Cloud (AWS Basics) EC2, S3, IAM, shared responsibility model	**Database** MySQL — schema design, SQL queries, joins
Web Development HTML, CSS	**DevOps & Automation** Ansible, Kubernetes (basics), Docker, Git, GitHub
Productivity MS Word, Excel, PowerPoint	**Networking** TCP/IP, DNS, DHCP, VPN basics

LINUX ADMINISTRATION

Hands-on experience with Linux system administration, including installation and configuration, user and group management, file permissions, package management, process and service management using systemd, storage and networking configuration, log analysis, and basic security hardening — primarily on Ubuntu and RHEL-based systems.

PRACTICAL EXPERIENCE

- Regular hands-on labs on TryHackMe and Hack The Box — enumeration, vulnerability assessment, and penetration testing practice.
- Applied Linux administration tasks in lab environments — user management, permissions, service configuration, and troubleshooting.
- Automated repeatable configuration and deployment tasks using Ansible playbooks in home-lab and practice environments.

CAREER OBJECTIVE

Seeking an entry-level opportunity or internship in Cybersecurity or Cloud Security to apply and grow Linux, networking, automation, and security operations skills in a real-world environment.
